Bioenergy...

Enviro has some of the most efficient wood stoves in the business. By using renewable wood fuel you are reducing the amount of fossil fuel emissions and electricity used, lessening the impact on our environment.

In your Enviro wood stove, wood fuel is:

- burned more efficiently, up to 84.7% * (lowering smoke emissions)
- an infinitely renewable resource
- neutral in terms of CO2 emissions - it is carbon neutral - burning biomass fuel merely releases the CO2 that the plants absorbed over their life spans
- a cost effective way to heat your home and give you comfort in knowing you are doing your part for the environment.

*See owners manual & specifications for details

Why buy an **Enviro** Freestanding Wood Stove?

The Boston 1200, Painted Black

The Boston 1200, Diamond Black Enamel Finish

The Boston 1200, Chestnut Enamel Finish

The Boston 1200, MEDIUM CAST IRON WOOD STOVE

The Boston 1200, Freestanding Wood Stove
Long Burn Times
Progressive Burn Technology is designed to keep hot embers in the firebox after a night's burning. This process is achieved by restricting the air in the back of the firebox, leaving hot embers for you to start up your insert again.

Clean Burning
Secondary air tubes add super-heated air to the fire as the burn progresses to the front for high efficiency and low emissions.
1200 & 1700 Performance Features

- large firebox capacity for long overnight burns
- single, easy-to-use air control adjusts the heat output and regulates the fire
- twin pilot injection ports tuned to deliver a fast start-up. These injection ports are 3" above the firebox floor so you can build a good deep ember bed and not affect low burn or start up.
- heavy-duty 304 grade stainless steel secondary air tubes for clean burns
- ultra strong air wash helps to keep the glass clean
- radiant heat is maximized through the large glass area (177 sq. in.)
- up to 18" log length on a 1200 firebox
Freestanding Wood Stove Features

- Clean Burning - EPA tested as low as 3.3 g/hr.*
- Baffle Warranty - Enviro gives you a limited warranty on the firebox baffle.**
- Up to 20” log length loaded North/South on a 1700 firebox
- Convection Heat - The optional convection fan moves the heat further into your home.

** See owners manual for details.
Features of the 2100 Enviro Wood Stove

Construction -

• up to 5/16” thick steel construction
• 1/2” diameter hinges and door handle
• standard cast iron ash plug and large ash pan
• fully lined brick firebox
• removable secondary air system for maximum efficiency
• Up to 22.5” log length loaded North/South
Specifications

** Tested to the NSPS standard

Efficiency and area heated will vary according to location and fuel. Approved for sale in Canada and the United States.

* Figures will vary considerably with floor plan, house layout and heat loss of house. Due to on-going product development, product appearances and specifications are subject to change without notice.
