Non-Combustible Board Placement

Minimum Venting Requirements
This appliance uses a 5" (127mm) exhaust / 8" (203mm) air intake vent pipe system. For safe and proper operation of the appliance follow the venting instructions exactly. Deviation from the minimum vertical length can create difficulty in burner start-up and sooting. Allow several minutes for the flame to stabilize after ignition under extreme vent configurations. It is recommended for vent lengths that pass through unheated spaces (garages, attics, crawl spaces) be insulated to minimize condensation.

NOTE: At least 3" (76mm) of clearance is required above vent when passing through an exterior wall when horizontally terminating.

Mantel Graph Dimensions

Mantel graph dimensions are measured from the bottom of the fireplace, if you wish to reference the mantle height from the tiling edge subtract 15 inches (381mm) from the mantle height depicted on the graph. If you plan to install a TV above your fireplace refer to the appropriate section of the owner's manual for available options. It is acceptable to install a combustible mantel over top of the non-combustible board. If you are activating the Cool Surface System you are eligible to subtract 12" (305mm) from the mantle height shown in this diagram.
(Optional Step) Cool Surface System Part 1

Dimensions

CSS Front Vent - Overall Dimensions (C34/C44/C60)

CSS Side Vent - Dimensions

Figure 4. Cool Surface System Front Vent - Overall Dimensions (C72)

Figure 5. Cool Surface System Combustible Facing Kit Dimensions
### Framing & Rough Opening – Front Vent

**CSS Outlet Min. Top and Bottom standoff = 2 5/8” (6.7 cm) *All C Series* **

- **C34:**
  - Min. Height: 45” (114 cm)
- **C44/C60/C72:**
  - Min. Height: 37 1/4” (94.6 cm)

**Revised Mantel Requirements:**

Note: Minimum height of mantle if you intend on using a surround is 31”

- **C34:**
  - 45” (114cm)
- **C44:**
  - 55” (140cm)
- **C60:**
  - 71” (180cm)
- **C72:**
  - 83” (211cm)

**Framing & Rough Opening – Side Vent**

**C34 = 45” (114cm) C44 = 55” (140cm) C60 = 71” (180cm) C72 = 83” (211cm)**

Min. Height: 51-3/8” (130cm)
**OPTIONAL STEP  Cool Surface System Part 3**

**Venting Clearances - Front Vent**

Shown here are the minimum framing and clearances for the CSS when the fireplace is installed with the minimum allowable vent length:

Min. Ceiling Clearance from top of CSS outlet = 4” (10.2 cm)  
Min. Ceiling Clearance in wall from top of CSS Body = 5½” (14.3 cm)  
CSS Body Min. Rear standoff = 2¾” (69.8 cm)

**Venting Clearances – Side Vent**

CSS Horizontal Vent - Min. Framing & Clearances

CSS Vertical Vent - Min. Framing & Clearances

*NOTE: 15.75” from the header is required for min. ceiling height. Rest unit on lower standoff. There will be a 3/4” (2cm) gap on from the top standoff to the header in this configuration.  
Min. Framing is 15” x 11.5”*
TV Installation Considerations:

If you are planning to mount a TV above your fireplace some considerations must be made to ensure it is protected from the heat.

**During testing temperatures did not exceed 121°F (49°C)** midway up the front wall (Figure 12 & 13). There is no guarantee that these temperatures will not harm the longevity of your TV. Make sure to consult your TV manufacturer’s specifications to find the maximum allowable operating temperature. Since every home and installation is unique, temperatures should be verified at the time of install if possible. If desired, front wall temperatures can be lowered to 104°F (40°C) with the use of a mantle (Figure 13). Refer to page 7 for revised mantle clearances. A TV should not be installed if temperatures exceed the manufacturers maximum allowable temperature.
